

INSURANCE COVERAGE

BHGR has one of the most experienced insurance coverage law groups in the Rocky Mountain region. We represent companies and individuals seeking to enforce coverage or recover policy proceeds under all types of insurance policies, including commercial general liability, commercial property, builder's risk, directors and officers, professional liability, homeowners, automobile, business-interruption, and environmental site liability policies. Our insurance coverage attorneys have contested coverage decisions issued by nearly every major insurer in the domestic insurance market as well as in the London insurance market. We have significant experience in insurance coverage for construction defect claims and claims for bad faith breach of insurance contracts.

BHGR's insurance coverage attorneys also assist clients in securing appropriate insurance coverage to protect against potential liability and ensure business or personal assets are protected. We assist our clients in reviewing and negotiating insurance policies to minimize the likelihood that disputes with insurance carriers will arise after a claim is reported—saving money and time. We have knowledge of the insurance brokerage market and routinely work with brokers to obtain quotes and negotiate appropriate policy endorsements. Our experience in litigating complex insurance coverage disputes helps us to better anticipate and avoid the problems that can arise before and after a claim occurs, and allows us to better serve our clients who call upon us for front-end insurance coverage counseling.
