

## RENEWABLE ENERGY AND CLEAN TECH

Boulder is the center of the new energy economy and BHGR is equipped to provide a range of legal services to developers, investors and entrepreneurs in the renewable energy and clean tech industries. The firm draws upon the experience of its corporate and finance, intellectual property, environmental, water, real estate/land use and construction lawyers in order to provide comprehensive legal services for wind, solar and geothermal development projects, transmission projects, consulting and services agreements and intellectual property development and commercialization. We assist clients with:

- Forming a business venture, or handling the disposition or acquisition of renewable energy development assets and projects
- Financing, private placements, syndications and venture capital financing
- Purchase, lease and easement agreements for solar and wind generation
- Colorado Renewable Energy Standards
- Legislative proposals
- Land use, including zoning and entitlements
- Licensing and permitting
- Intellectual property protection and commercialization strategies
- Power purchase agreements
- Surface and groundwater permitting
- Tax credits and other incentives
- Litigation and dispute resolution
